# Book publishing house website

My first website

Milo Masoničić

Why I chose to make website for a indie publishing house?

- Love for books and cd cover art
- Potential for an interesting web-design inspired by book covers and graphic design
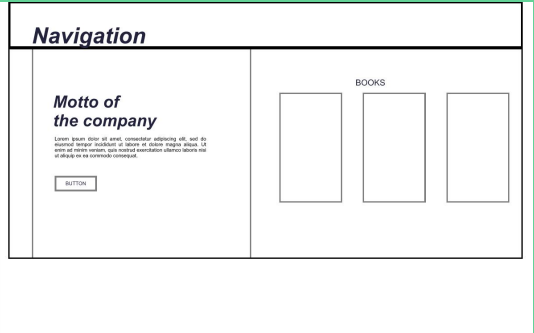

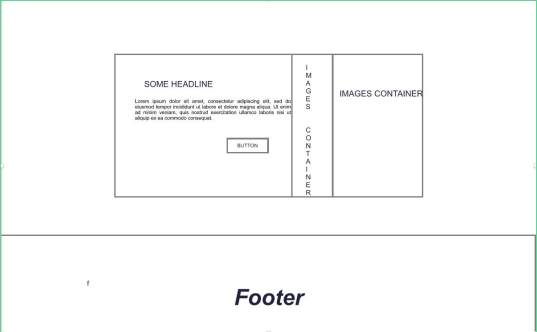

Working process

- Low fidelity wireframe
- Moodboard
- Color palette and images
- High fidelity wireframe
- Programming

books written by nobel prize winners

Footer
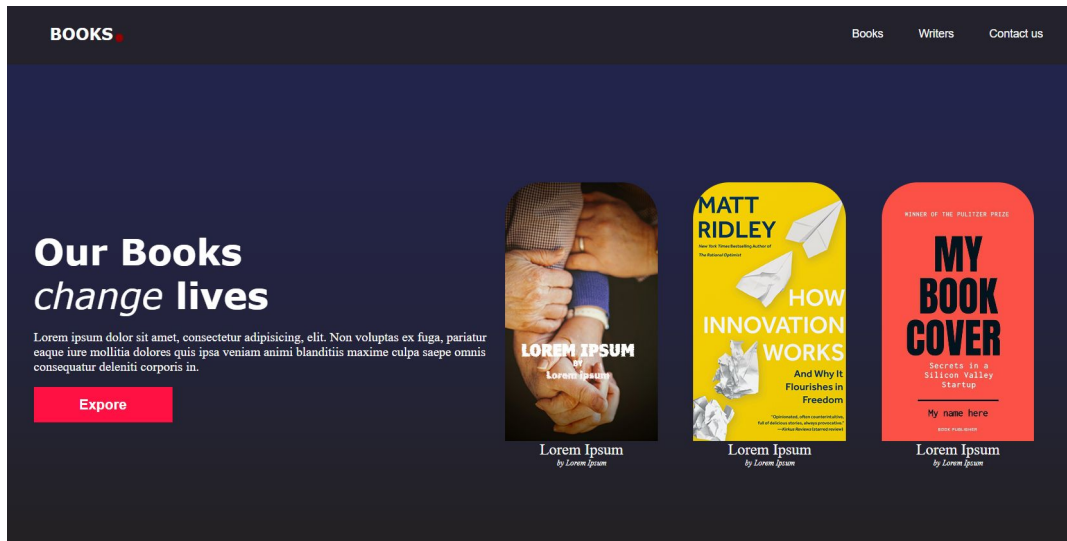

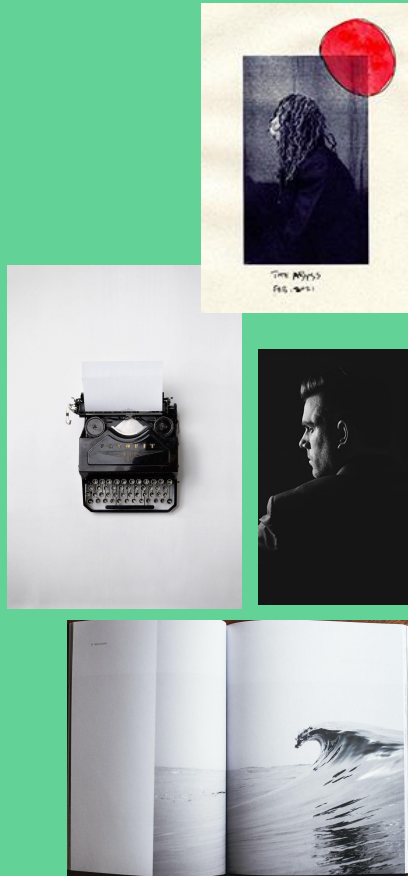

Color palette

- Considered using complementary color palette

- Decided to use 3 color linear gradient instead

- background-image: linear-gradient(#23244d, #23233d, #23211d)

Moodboard
And some images
Used for the website

Important programming concepts

1. Box model

2. Flex and grid layouts

3. Media queries and breaking points

GRID CONTAINER

```
.popularBooks {
        margin-top: 220px;
        width: 80%;
        padding: 10px;
        display: grid;
        grid-gap: 20px;
        grid-template-columns: repeat(6, 1fr);

}
```

FLEX CONTAINER

```
.comics {
        margin-top: 150px;
        width: 80%;
        height: 400px;
        display: flex;
        border: 2px solid darkred;

}
```
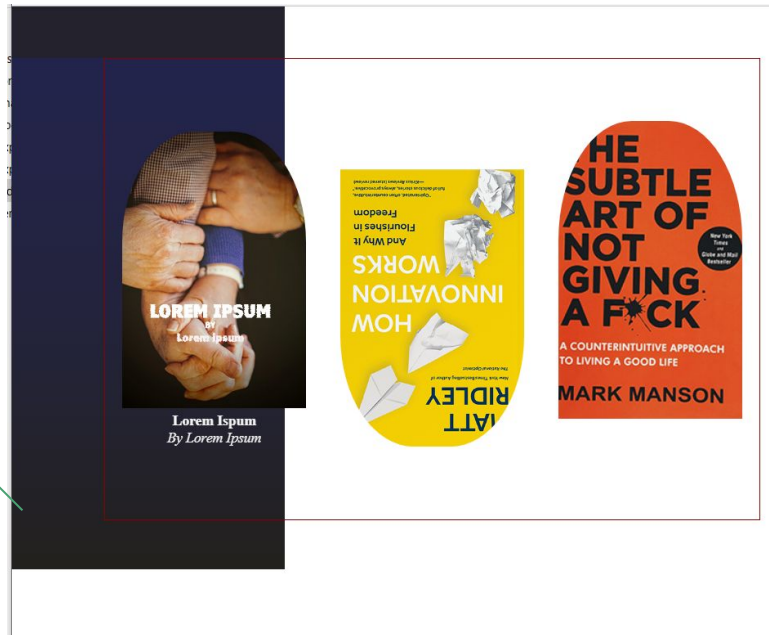

Overflow and horizontal scroll

Potential reasons:

- Not using max and min width
- Padding of elements
- Position relative

Potential solution:

- Avoiding absolute dimensions
- Not forgetting that the width property in CSS targets the width of the element's content area, but the actual width is content area + padding + border if box sizing is not set to border-box
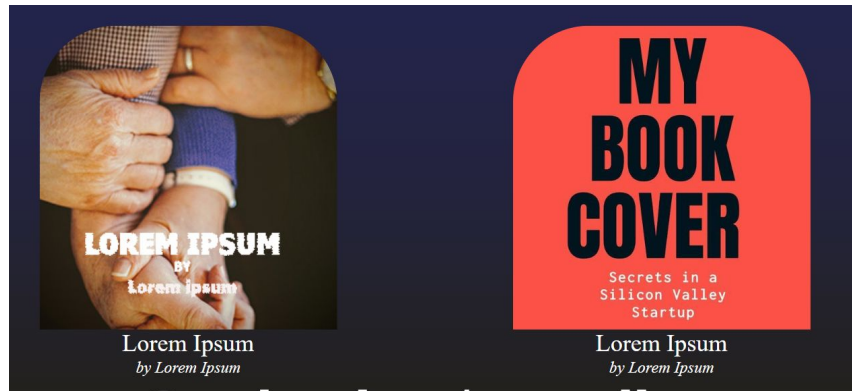

Object-fit property and div height

Giving relative value of
100% to height property of image wrapper div can
cause problems displaying image which is not used
as background image

Notes:
- Cover value + width:100% + height:100% is good solution for background images
- Contain + width set in % is good solution for other images

Clip path - an interesting property

- Property that helps us make unexpected shapes

- https://bennettfeely.com/clippy/ (Bennettfeely website)

Project Timeline

Third stage/Current stage

1,Fixing errors that led to the overflow
2.Making site fully responsive

First stage

Design of the web site.

06.12.2022

20.12.2022

01.12.2022

12.12.2002

Second stage

Programming for the wide screen

Final stage/Next stage

Analyzing the project (.taking care of consistency, adding links, fixing cosmetic errors)

Conclusion:

This project taught me that, in programming and web design, there are many solutions to one problem. Having clear idea about website is road to success.
